

Methods in promoting childrens voices in clinics

Child centeredness

VOKSNE FOR BARN

A preventive talk with fokus on child centerdeness

- Take place when parent get treatment in a clinic
- Focus on the childrens perspectiv and the consequenses for the children

VOKSNE FOR BARN

Focusing on childrens perspective (Child centeredness)

- Three Talks
- *First Talk: With the parents alone.* This is a introduction and also a preparation for the next talk.
- *Second talk:* Depending on wishes and needs (parents, children or proffesional); with the children alone, siblings together or parents and children together
- *Third talk:* Feedback and recomondations

VOKSNE FOR BARN

The talk with the parents

- Talking to the parents about their children
 - Strengths and weakness
 - Consequences for the children
 - Their concerns
 - What do they want their children to know
 - Do they want to talk to their children themselves

VOKSNE FOR BARN

The talk with the children

- What do the children think about the situation
- To listen to the children and their own story
 - Relating to the parental concern, other children in similar situations....etc
- Give information accord with the parents
 - The disease or problem, treatment etc
- Prepare feedback for the parents

VOKSNE FOR BARN

The talk with the family together

- Feed-back to the parents
